EDUCATION

De La Salle University Manila

BS Computer Science Major in Software Technology, GPA: 3.558/4.0

2401, Taft Ave, Manila

Expected Graduation Date - Sept. 2027

Centro Escolar Integrated School Manila

STEM

1008, Mendiola St., Manila

June 26, 2023

EXPERIENCE

Frontend Domain Lead

La Salle Computer Society

Sept. 2024 – Present

2401, Taft Ave, Manila

- Architected the frontend tech stack for the R&D committee, establishing standard practices that accelerated development cycles for multiple inter-organization projects.
- Collaborated with designers and backend developers to deliver scalable web solutions.

Backend Developer

Google Developer Group on Campus

Sept. 2024 – Aug. 2025

2401, Taft Ave, Manila

- Engineered scalable Backend APIs, reducing data retrieval latency and supporting core functionalities for the organization's web application.

PROJECTS

LSCS Content Management System | NextJS, PostgreSQL, PayloadCMS, Docker

Sept. 2025

- Spearheaded the development of an internal CMS, accelerating the deployment of event and recruitment websites from weeks to days by centralizing digital asset management and streamlining API access.
- Developed customized RESTful APIs using Next.js and PayloadCMS to seamlessly deliver content across multiple organization websites, article repositories, and blogs.

Tao-Filipino Neural Machine Translation (LoResMT 2026) | Python, HuggingFace, NLLB-200

Dec. 2025

- Co-authored published research on bootstrapping a Tao-Tagalog Neural Machine Translation system for ultra-low-resource settings using the 600-million parameter NLLB-200 model.
- Spearheaded data curation and pre-processing of a complex parallel corpus, ensuring strict alignment and tokenization constraints for model training.
- Implemented data validation across BLEU, chrF++, and SBERT metrics, contributing to a multi-faceted approach that successfully mitigated liturgical bias and achieved a 34.85 BLEU score.

Lasallian Enrichment Alternative Program | NextJS, MySQL, Tailwind, Shadcn, SpringBoot, Docker

May 2025

- Designed and implemented a responsive, high-performance frontend optimized to handle high concurrent traffic during peak registration periods for a university-wide enrichment program.
- Scaled the platform to successfully process registrations for 29,000 total student users, ensuring zero downtime and a seamless cross-device experience.

Konektinda | React Native, PostgreSQL, NativeWind, Cypress, SpringBoot, Docker

Nov. 2025

- Served as Scrum Master for a team-based Software Engineering class project developing an e-commerce platform for local karinderiya owners.
- Facilitated Agile ceremonies (sprint planning, stand-ups, reviews, retrospectives) to coordinate frontend, backend, and design teams, streamlining delivery of features.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (Postgres, MySQL), JavaScript, HTML/CSS, Ruby

Frameworks: React, React Native, NextJS, NestJS, Node.js, Flutter, Expo, FastAPI, Flask, PyTorch, Tailwind, Material-UI, Drizzle ORM, TanStack Query

Developer Tools: Git, Docker, Github Actions, Firebase, VS Code, Visual Studio, PyCharm, IntelliJ
